

# Power Market Analyst

Based in London

## The Opportunity

LCP Delta are seeking a Power Market Analyst to join our short-term energy markets practice. This is a great opportunity to become an expert in GB and European power markets and the energy transition, within a supportive and rewarding work environment.

### This is a great opportunity to:

- Develop, manage, and deliver leading research and analysis on short-term power markets.
- Be at the forefront of a high growth and rapidly evolving sector within the energy transition.
- Become a recognised thought leader in GB and European power markets.

### Your role will involve:

- Conducting in-depth research and analysis on the rapidly evolving GB power market sector, with an aim to produce meaningful and consolidated content for the market. This will include a variety of qualitative and quantitative methods, including:
  - data analysis of market trends and events, making use of our market-leading short-term power markets tool, Enact
  - attending market webinars and events, and summarising key information to help the market keep track of market design changes
  - face-to-face and telephone discussion with industry experts and other professionals
  - secondary research, identifying and analysing data from other sources
- Tracking closely the dynamics of the balancing, wholesale and frequency response markets to help keep an eye on what our clients will be paying attention to. This will include analysis of new markets and services being offered in the sector, as well as trends in prices, volumes and participant behaviour across these markets.
- Working alongside the Enact, and Energy Economics and Finance team, who are also keeping a close eye on the markets and changes in policy.
- Managing and delivering engaging and meaningful content to our network and eventually research subscribers in the form of reports, data analysis, and viewpoints.

- Performing data analysis to help summarise and identify key data points that are worth publicising.
- Communicating with clients or subscribers via presentations and calls. This may extend in the future to providing webinars on the market.
- Building relationships with industry contacts on behalf of the company, developing client relationships and contributing to the development of the business
- Becoming a thought leader, identifying trends and sharing insight on short-term energy markets.

## LCP Delta's Short-Term Power Markets Team

The power markets practice at LCP Delta sits across a few of our key teams: including the Enact and Consulting Modelling team.

Enact is LCP Delta's market-leading data visualisation, analytics and forecasting platform aimed at the short-term power markets. The team now work with the majority of the GB power market, supporting traders, analysts and asset owners in tracking live minute-by-minute changes in the day-ahead, intraday and balancing markets. This is through both our platform and bi-monthly catch-up calls. The analysis you produce will directly help contribute to these.

Our Consulting Modelling practice supports lenders, investors and asset owners in making strategic decisions and help assess the impact of policy on their investments across the UK and Ireland. We support with market forecasting, revenue stacking, asset valuation, dispatch optimisation, auction bidding strategies and policy impact analysis. Our clients include generators, suppliers, investors, strategists, traders and policy analysts. Within this sit the Energy Economic and Finance team who have a wealth of experience in the energy sector.

While you will work very closely with both teams, your day-to-day will be working alongside the Enact team, helping to push and develop our content offering. LCP Delta do not currently offer a subscription content service in the GB power market, and your work will be critical in helping us build-up our coverage and start this service.

## Requirements, Skills and Qualifications

If you've got the right skills for the job, we want to hear from you. We encourage applications from the right candidates regardless of age, disability, gender identity, sexual orientation, religion, belief or race.

For this position, you will be able to demonstrate:

- Relevant BSc, MSc, PhD, or MBA qualifications, alongside 1+ year's work experience in relevant aspects of the energy sector, working with (for example, but not limited to) energy companies, technology manufacturers, policy makers, 'start-ups' or industry associations would be an advantage.
- Interpersonal, organisational and project management skills.
- Writing, data analysis and presentation skills.

- Proficient use of Excel
- Basic to intermediate Python knowledge would be useful, but not required.
- Collaborative and team oriented working skills.
- The ability to synthesise information and insight from a variety of sources, to create impactful research for our clients.
- A willingness to develop new industry contacts and clients and attend events where required.
- Commercial acumen - the ability to think commercially about the needs of our clients.
- Customer focus - an understanding of what GB power market players would be looking for.

## About LCP Delta – Experts in New Energy

Founded in 2004 and based across the UK, France, Norway, the Netherlands and beyond, LCP Delta provide data-driven research, consultancy, technology products and training services to companies investing in and navigating the energy transition.

LCP Delta was formed through the merger of Delta-EE and LCP Energy to bring together deep generation and consumer-side expertise, to provide our clients with a single partner to help them on their journey and provide them with a 360° view across the energy spectrum.

We are a diverse team from a variety of backgrounds including engineers, data analysts, environmentalists and more. All of us want to make a difference to the energy transition and accelerate the path to a low carbon future.

## What is in it for you?

Creating a great company culture and being a place that people love to work is very important to us; we are a collaborative, inclusive and friendly team.

As well as joining a fun, collaborative, and people orientated organisation where your personal and professional skills will be developed to make you the best you can be, we offer an attractive benefits package designed to promote your overall wellbeing so that you are able to perform to your full potential both in and out of work.

We continuously strive to build an inclusive workplace where all forms of diversity are valued, including age, background, disability, gender, gender identity, gender expression, race, religion, or sexual orientation.

## Application

If you wish to apply, please do so as soon as possible by submitting your CV and a **short covering letter** (less than 250 words) via our [careers page](#).
